

The CMK Alliance Plan 2026

A Business Neighbourhood Development Plan for Central Milton Keynes

Summary for Residents and Businesses

What is the CMK Alliance Plan?

The CMK Alliance Plan is a pioneering **business neighbourhood plan** prepared by an alliance of local residents and business leaders. It builds on the success of the last fifty years and plans the continuing growth of the city centre over the next fifteen. The plan takes a balanced approach: promoting growth and development whilst retaining CMK's competitive advantage as a distinctive place, with a high quality of life and range of amenities.

There are almost 120 acres of land yet to be fully developed in CMK. Here, the plan proposes to:

- Expand and diversify the retail offer of CMK;
- Build more offices to attract jobs;
- Reserve key sites for major opportunities, such as the proposed development of a university;
- Complete almost 5,000 new dwellings and;
- Enrich our social, sporting and cultural life with new facilities.

The Plan's Vision for CMK

By 2026, Central Milton Keynes will be:

- One of the most accessible city centres in the UK, pioneering sustainable yet convenient transport choices for workers, visitors and residents;
- The home of an expanding university, delivering innovative approaches to higher education and nurturing new business ventures;
- A vibrant and safe place, with an increasingly regional and national role, that welcomes everyone with an interesting mix of shopping, leisure, sports, cultural and social facilities;
- An admired, prestigious city centre, confident in its distinctive urban character and quality infrastructure;
- The home of people and organisations actively reducing their carbon footprint;
- An inclusive place, encouraging participation and interaction, connecting people, stimulating ideas, and inspiring future generations;
- The centre of civic life in Milton Keynes.

The Town Planning System

The planning system is used to decide what gets built, where and when. It is essential for supporting economic growth, improving people's quality of life, and respecting the natural environment and our heritage. The CMK Business Neighbourhood Plan, if approved at referendum, would form part of the planning guidance for the city centre, making sure that new developments are built in line with the needs and wishes of local people and businesses.

Summary of the Plan's Policies

Building on our Unique Heritage

- CMK has a strong identity or 'brand' as a place. The Plan recognises and supports CMK's unique public realm which contributes to the appeal of MK as a whole, improves the quality of life in the centre, and distinguishes our unique centre from all other cities.
- The plan requires new developments to respect the classic CMK infrastructure. This includes the grid of tree-lined boulevards, pedestrian underpasses and porte cocheres (covered walkways), as part of our working, modern heritage.
- There are policies to protect Campbell Park, to retain existing public open spaces and to create new ones, including a new boating marina on the canal.
- The plan requires development to be achieved within CMK's existing grid layout and development plots. This will accommodate the planned growth without changing the spacious, tree-lined street scene.
- The details and materials of new buildings are required to be well considered and of high quality.
- New buildings taller than eight storeys will be tested against strict criteria before being approved, including any 'wind tunnel' effect and overshadowing nearby developments.

*A Plan for Prosperity
Building on CMK's unique advantages*

Creating a Vibrant Regional Centre

- Just as important as retaining CMK's distinct design and heritage is supporting its growing role as the centre of a busy, prosperous region.
- The plan promotes more diverse, mixed-use developments that will encourage variety and contribute to the economic, social and environmental well-being of Milton Keynes.
- It supports the aspiration to establish a major university in CMK. The aim is to have 5,000 students studying locally by 2026.
- The plan reserves two prime sites in CMK for major institutions. This could be the university, or a new company headquarters whose scale and reputation would raise the profile of Milton Keynes, nationally and internationally.
- It is important that the centre remains a desirable place to live, so the plan promotes a wide mix of homes, including affordable and social housing, with high standards of design.
- To support its growing population, sites are identified for the provision of new sports, community, and medical facilities.

*A Successful Regional Centre
A place to live, work and enjoy*

Improving Transport and Parking

- Ease of access and parking have always played a vital role in CMK's success. The plan provides **more parking** for business developments in CMK, and **more visitor parking** for residents in Campbell Park.
- To make it easier to find unoccupied parking spaces, new parking facilities will be required to incorporate real-time monitoring and digital-sign technology.
- The plan proposes a high frequency CMK shuttle service to link up all business, retail and parking areas, thereby making better use of under-used parking spaces.
- In the long term, public transport, walking and cycling have to take a larger share of journeys. The plan identifies sites for a second public transport hub in the main shopping area, with integrated passenger facilities, including seating, café and toilets.
- To promote more cycling, new developments are encouraged to provide secure cycle storage and changing facilities, as well as contributing financially to improvements to the cycle network.
- Finally, the plan aims to make walking in the centre more enjoyable and safer. Developments facing the boulevards and gates should provide active entrances and glazed façades on the ground floors, and offer weather protection such as colonnades.

Diversifying the Main Shopping Area

- The plan's strategy is to transform the main shopping area into the 'heart' of the city with a more diverse spread of retail, leisure, community and cultural activity.
- The development of more hotels and apartment living is encouraged.
- To diversify the retail offer, major new retail developments should provide a range of small, independent shops.
- A new public space is envisaged with animated public art and programmed events – a place where Milton Keynes meets, celebrates and sometimes demonstrates.
- The plan proposes a covered market hall to complement and enhance the outdoor market. Improvements to the existing market are also important.

Neighbourhood Planning and Community Engagement

What is Neighbourhood Planning

Neighbourhood planning, part of the Localism Act passed by Parliament in 2011, aims to make the planning system more democratic by letting local people, who know and care about an area, undertake the planning for it.

Once local people have prepared their 'neighbourhood plan', it is examined by an independent expert to make sure it is 'sound'. The plan is then put to a referendum vote so the entire community has the final say on whether the plan should be adopted or not.

The CMK plan is the first *business* neighbourhood plan in the country. This refers to a plan that covers an area which is predominantly commercial, such as Central Milton Keynes. One important feature of a business neighbourhood plan is that *two* separate referendums will be held, one for residents and one for businesses.

Why We Need a New Plan for CMK

The main planning documents for CMK were prepared over ten years ago, and much has changed since that time. Many of the existing policies for CMK are no longer considered achievable or even desirable.

Perhaps more importantly, the CMK Business Neighbourhood Plan is a clear statement of intent in terms of how *local* people and businesses want to see our city centre develop in the coming years.

Engagement with Residents and Businesses

The CMK Business Neighbourhood Plan has been prepared by an alliance of local residents and business leaders, including members of the CMK Town (parish) Council, local Ward Councillors, business representatives such as the Chamber of Commerce and Small Business Federation, the voluntary sector and Parks Trust.

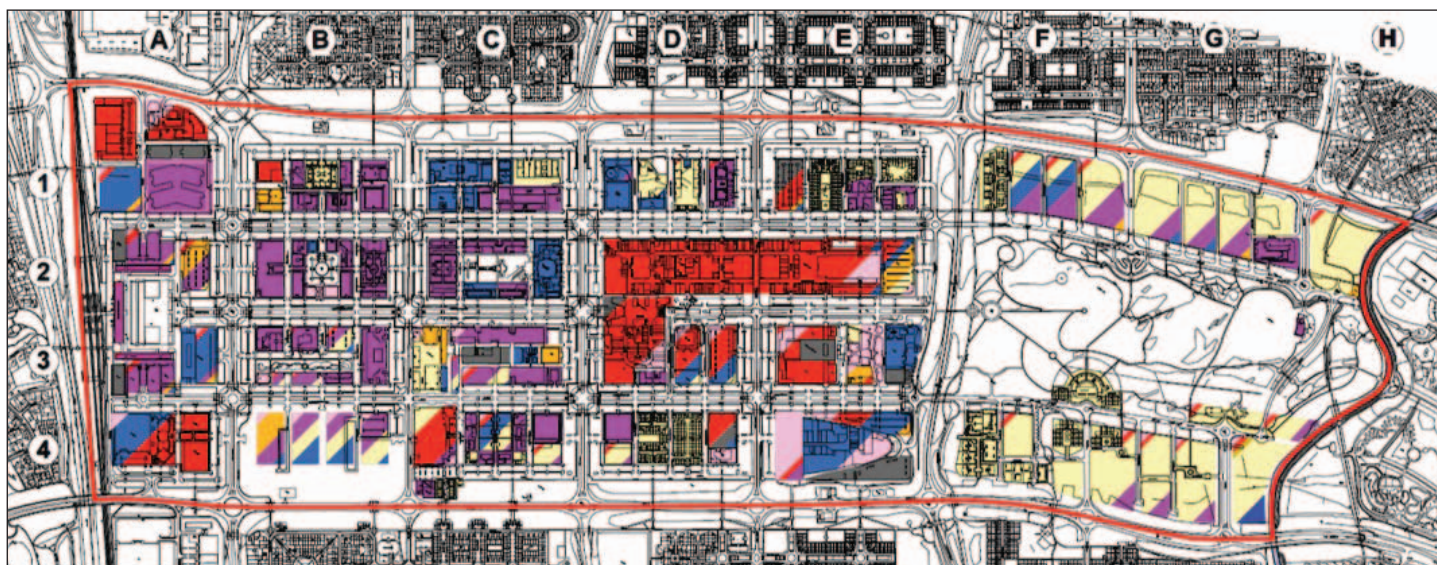

There has been significant public engagement in preparing the plan. A special website was set-up in April 2012 which attracted over 800 visitors and 150 registered users. Eight public workshops were held, five 'expert panel' sessions and 20 stakeholder meetings with a wide range of commercial and not-for-profit organisations.

What's Next

Having successfully passed examination, the CMK Business Neighbourhood Plan will be put to a vote by residents and businesses on **7th May 2015**.

If it passes both referendums, the plan will be adopted by Milton Keynes Council and be used to guide development and decide planning applications in CMK.

More information on the referendums is available at: www.milton-keynes.gov.uk/CMKBusinessNeighbourhoodPlan
